> Subject: Re: ecological assessment

> Bob,

> Attached is report on the fishery conditions of the upper Animas River above and below Durango. It was written by Aquatic Biologist Jim White and reviewed by Senior Biologist John Alves. The report provides trend data over several years with some discussion of possible related habitat conditions (flow, temps, water quality).

> Jim has much more more detailed data on total fish species relative abundance, stocking, length frequency, growth, estimated mortality rates, fry counts, etc. In addition, he also has trend data for non-sport species like flannelmouth and bluehead sucker.

> If you feel this report adequately and appropriately addresses the request from EPA, please feel free to pass along to Mr. McGrath.

> Thanks
